ATTENTION CYLINDER OWNERS

It has recently come to our attention that a scuba cylinder has exploded while filling causing terrible injuries to the fill operator.

It seems other explosions have previously occurred in Australia and overseas with regards to these particular cylinders.

In the interest of OH&S and client safety, from 1/09/2009 Scuba Com will **not accept** for **testing** or **filling** the following cylinders.

- CIG/Luxfer cylinders marked with **AS1777** manufactured between **1975** and **1990**, where the serial number does **not** start with an **S**.
- Luxfer cylinders marked **DOT3AL** or **DOT6498** manufactured between **1972** and **1988**.

We thank you for your understanding in this matter.

Steve Robinson
Test Station Manager (Registered Test Station 365)
